You deserve a trailer you can rely on and that you know will be with you in the long run. Yacht Club trailers have been designed and manufactured for more than 40 years exceeding 500,000 trailers sold.

Whether you own a personal watercraft, fishing boat, pontoon boat, 15,000-pound cruiser, or something in between, we have a high quality polyester powder painted, hot-dipped galvanized, or aluminum trailer model to fit your needs.

It's In the Details

Eagle Trailer is known for the "World's Finest Custom Trailers." However, having the finest doesn't make it the most expensive.

Over 40 years in the industry has taught us that the best approach to the perfect trailer starts with a perfect fit. Our Eagle exclusive long range 3D laser scanner provides 20 - 30 million points of reference on each boat to begin a pattern, followed by 3D Inventor CAD programming and design from our engineering staff to precisely create that perfect trailer pattern.

Our pontoon trailer models show why Yacht Club is the industry leader. Based on four series to cover all needs, our newly designed frames and features add up to the best choices in pontoon trailers.

Yacht Club / Sport Club / Eagle

is not just an "assembly" facility.

We fabricate most of the components used to manufacture trailers utilizing our great team members, CAD, CNC, Laser, Robotics, and Automation. From in-house design to delivery on our own fleet of semi trucks, **we have complete control of the process.**
